Podcast App For Os X

Check out our new app at the Google Play store If you like what you see, please rate us in the App.. When clik on the new episode notifications, should open the corresponding podcast, so that I can play the episode.. Dev doesn't seem very active, though. x and above Optimized for Android OS 4 x and above users on supported new generation Android devices.. The app does not download new episodes automatically in background, you have to start the app.. Adding downloaded episodes automatically to playlist would be nice, when I manually download them.. Check out our new app at the iTunes store The PodcastOne v3 0 app is optimized for users of iOS version 6.
